August 2009

Most of the misprints and errors in the first print (2005) have been corrected in the 2007 reprint. This paper contains the known misprints and errors in the 2007 reprint.

- p13**, Fig 1.3, the right box, point 3 should read: Cumbersome.
- Fig 1.3, the right box, last line should read: task failure or annoying to many users
 - line 7 under the figure should read: Cumbersome. The user complains that the system is cumbersome; or we
 - Annoying should be replaced with "cumbersome" in many other places. Only the most important are mentioned below.
- p106**, line 3 should read: at the age of 6-9 months.
- Line 5 should read: before the age of 6 months.
- p155**, Fig 5.5A: Line 3 in the box should read: Session rule: Small, related "tasks" without breaks as one task.
- p177**, Fig 6.2. Note that the list of *Sources* covers points in the text on page 176 as well as 178. It is confusing to the reader, but not easy to correct.
- p218**, line 17 from below should read: button and write it down next to the virtual window . . .
- p439**, Figure 13.7A, the right box, point 3 should read: Cumbersome.
- line 7 under the figure should read: Cumbersome. The user complains that the system is cumbersome, or
- p509**, Fig 16.6. Guideline notes as well as examples are numbered a, b, c. Very confusing. Examples should be numbered E1, E2, E3.
